

We're flying high on energy efficiency

PURE POWER FOR FLAT ROOFS, PV AND FACADES

Welcome to the Rückert Group

Our teams have a drive and power that never fails to impress our customers. With proven industry expertise, we provide competent on-site advice, carry out many construction services in-house, manufacture individual components ourselves on state-of-the-art production lines, and process standard materials with precision-fit machines.

Our vehicle fleet is enormous, and our construction crews are well-coordinated and competent. Our network is unparalleled when it comes to reliable suppliers or the project integration of market partners.

Flat roofs, facades, fantastic – architects, engineers, property planners, and builders appreciate our performance right up to the absolute premium range. In Germany, Europe, and far beyond. As we work in a goal-oriented, professional, reliable, honest, and down-to-earth manner: When will you get to know us?

Erik Rau
Rau + Rückert GmbH

The solution is also on your roof

As one of the leading specialists in flat roofs, facades, and photovoltaics, we think and act comprehensively. We ensure that the entire building envelope is permanently sealed and that the best photovoltaic system harmonizes perfectly with your specific building.

The result: maximum profit-generating complete systems with the greatest possible performance, safety, and long-term functional reliability.

FINALLY FREE FROM ENERGY DEPENDENCE

“GUTEN DACH” EVERYONE*

* Our signature German pun: a greeting and a promise in one. “Guten Dach” plays on a dialectal pronunciation of “Guten Tag” (good day), while literally meaning “good roof”. It’s both a friendly welcome and a reflection of what we do best: building high-quality, reliable roofs.

Who we are, where we come from

The Rückert Group is one of Germany's largest full-service providers when it comes to new construction, renovation, and maintenance of the entire building envelope for commercial and public buildings. Renowned companies and major brands have been relying on our services for more than 35 years.

As a second-generation family business, our sole focus for over three decades has been on the best systems for walls and roofs. No one can beat us in this field. We employ over 450 superheroes who install and renovate flat roofs, facades, and photovoltaic systems using state-of-the-art technology, keeping them energy-efficient, watertight, and safe with the latest maintenance concepts. That is our promise to you.

The facts

- Over 450 motivated employees
- 28 million square meters of flat roofing installed
- In-house production and industrial sheet metal workshop
- Around 60 installation teams with more than 100 vehicles in operation
- An additional 10 service technicians
- More than 10,000 projects completed
- 7,000 square meters of production/storage space

The target groups

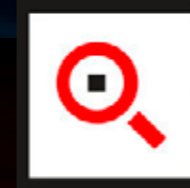

- Planners, engineers, and architects
- Small and medium-sized industrial and commercial enterprises, including corporations
- Public sector
- General contractors

FOUNDED IN THE SOUTHWEST, AT HOME THROUGHOUT GERMANY

“What our customers particularly appreciate: our reliability, our professionalism, and above all the fact that they only need a single point of contact for the entire building envelope and its maintenance.”

Marc Rückert
Gebrüder Rückert GmbH & Co. KG

This is the level of expertise you need

At the Rückert Group, we specialize in flat roofs and facades, covering many individual areas of expertise that make us your single point of contact for all aspects of building envelopes. Our customers in industry and the public sector can rely on our professionalism, expertise, and experience in each of the following areas of expertise:

COMPETENCIES UNDER CONTROL

- Fall protection
- Asbestos removal
- Bitumen roofs
- Roof waterproofing
- Roof penetration

- Green roofs
- Roof renovation
- Roof maintenance
- Ventilation / Smoke extraction
- Drainage

- Flat roof
- Facade / facade renovation
- Liquid plastic waterproofing
- Industrial roof
- Plastic membrane waterproofing

- Leak detection
- Skylight dome / skylight strip
- Metal roof
- Photovoltaics
- Safety anchors / anchor points

- Solar
- Steel trapezoidal roof / load-bearing shell
- Steel trapezoidal profiles
- Inverted roof
- Thermal insulation

At the Rückert Group, our core competence lies in offering impressive superpowers for maximum performance in all aspects of flat roof construction, regardless of the materials and construction methods used.

LEADING IN FLAT ROOFS

FLAT ROOF – TOP PERFORMANCE FROM CONSULTATION TO EXECUTION

As one of Germany's first major roofing companies, we specialize exclusively in flat roof systems. Our expertise and experience with all systems on the market are correspondingly high. We provide advice in advance, cooperate on an equal footing with architects, engineers, planners, and builders, respond quickly to individual adjustments, and deliver a high-quality finish thanks to our exceptional fleet of vehicles and our large number of well-coordinated installation, service, and green roof teams operating nationwide.

- **New construction, renovation, maintenance of all flat roof systems**
- **Energy for your flat roof: solar thermal and photovoltaics**
- **Green roofs with added value**
- **Integration or retrofitting of: daylight systems, ventilation, smoke extraction, thermal insulation, lightning protection, fall protection**
- **Implementation of all roof penetrations or built-in components**

At the Rückert Group, we bring impressive superpowers to the creation of contemporary facades for commercial and municipal buildings. For the highest standard in aesthetics, design, functionality, and materials, the Rückert Group is your specialist partner, dedicated precisely to these areas.

FANTASTIC FOR INDUSTRIAL FACADE

FACADE – SYSTEM SOLUTIONS OF THE HIGHEST STANDARD

Only the best for your building envelope

The Rückert Group is one of the most renowned companies in southern Germany when it comes to cladding entire building envelopes. Whether we are working for architects, engineers, planners, general contractors, or directly for companies and local authorities, our specialists create metal facades, facade designs with expanded metal, slatted facades, wall systems in trapezoidal sheet metal, standing seam, sandwich elements, or smooth facades. Our promise to our customers: We find the perfect balance between appearance, function, and budget, create a professional plan, and realize your facade quickly, easily, and in the very best quality.

Our recognized expertise in virtually every facade system on the market ensures that you receive the best solution in terms of aesthetics and functional safety when implementing an architectural idea. All of the building systems we use guarantee solutions with precisely tailored sound and thermal insulation values.

THE ART OF

THE PREMIUM FACADE –
WE IMPLEMENT

WHAT YOU DESIRE

Aesthetic facade solutions in perfection

We combine aesthetic design with state-of-the-art technology for your project. Our comprehensive services include the planning and implementation of innovative facades as well as the use of high-quality facade systems from leading manufacturers. Whether you are looking for custom-made facades, energy-efficient sandwich facades, robust cassette facades, or green building envelopes, we offer tailor-made solutions that are both visually appealing and functional. With us, you can count on quality, durability, and an impressive appearance.

Naturally profitable: photovoltaics and green roofs are an unbeatable combination for sustainable energy generation. They store water, reduce peak runoff, filter dust and noise, protect the roof waterproofing, and lower ambient temperatures, which increases the yield of the modules. The substrate layer of the green roof serves as ballast for the PV structure, eliminating the need for anchoring to the roof structure.

AHEAD IN PHOTOVOLTAICS

Harness the energy of your roof surface

For industrial and public buildings in particular, the horrendous rise in energy costs has become a massive drain on resources, throwing many calculations off balance. Hardly any company remains for which energy is not a decisive competitive factor. You have probably already considered the power of the sun and how to become independent of daily price fluctuations. But who can advise you without obligation and with proven expertise, guide you through the complex landscape of subsidies, and provide reliable, verifiable cost-benefit plans tailored to your unique situation?

SUSTAINABILITY MEETS ENERGY SAVINGS

Trust the PV professionals

At the Rückert Group, we specialize in industrial companies and public buildings and focus exclusively on photovoltaics throughout Germany. After all, the higher the level of self-consumption, the faster the return on investment. Large roof areas are perfect for generating energy with photovoltaic systems.

With targeted measures to increase self-consumption, such as electricity storage and heat pumps, we quickly provide profitable solutions. A win-win situation for the environment and economic efficiency that you too should take advantage of.

Whether you need to renovate old buildings to make them more energy efficient or repair acute damage, take advantage of our proven expertise. If your flat roof develops a defect, for example due to water, storm, hail, or wear and tear, it is important to locate and analyze it as quickly as possible. Our expert knowledge is irreplaceable in this regard.

STRONG IN RENOVATION

For watertight security

Inspection and maintenance contracts from the Rückert Group give you one thing above all else at low and predictable costs: security. Security against the often inevitable fact that small defects can develop into major damage—with follow-up costs that no one had anticipated.

That is why renowned companies and municipalities rely on the Rückert Group for ongoing inspection and maintenance services—and, if necessary, complete renovation. We would be happy to convince you too!

MAINTENANCE & SERVICE

We keep your facade in good shape

Our customized and transparent maintenance and service concepts ensure that your facade can withstand all signs of wear and aging. The life expectancy of the entire building envelope increases significantly, and maintenance costs are reduced in the long term.

Renovation – Looks like new

Do you have defects and/or want to renovate your facade in terms of energy efficiency, appearance, and safety? With us, you will find the partner who makes the difference thanks to decades of experience, in-depth market knowledge, and highly trained employees.

After clearly communicating the costs and time frame, we will give your partial or complete renovation project the perfect facelift – naturally in compliance with all legal requirements.

Tools & Technologies

With proven, state-of-the-art performance and service packages, we ensure fast, economical, and professional results:

- Inventory and cataloging
- PV-Ready Check
- Leak detection using specific measurement methods
- HV-SLD leak test
- Roof maintenance concept with RPP Roof
- Protection Plan
- Flat roof digitization with Rückert
- Roof Monitoring
- Coordinated overall photovoltaic concept and implementation

EFFICIENCY AND VALUE RETENTION
OF BUILDINGS AND PV

Photovoltaics & flat roofs

Would you build a house on unstable foundations? Certainly not. The same applies to the construction or retrofitting of a photovoltaic system. The investment must be sustainable in order to avoid serious follow-up costs. The roof must be perfectly prepared and remain permanently watertight.

And what our customers appreciate most: from consultation to project completion and ongoing maintenance, you have a single point of contact with full responsibility. We are also happy to provide green roofs with photovoltaics.

THE UNBEATABLE DOUBLES
FOR YOUR ENERGY BALANCE

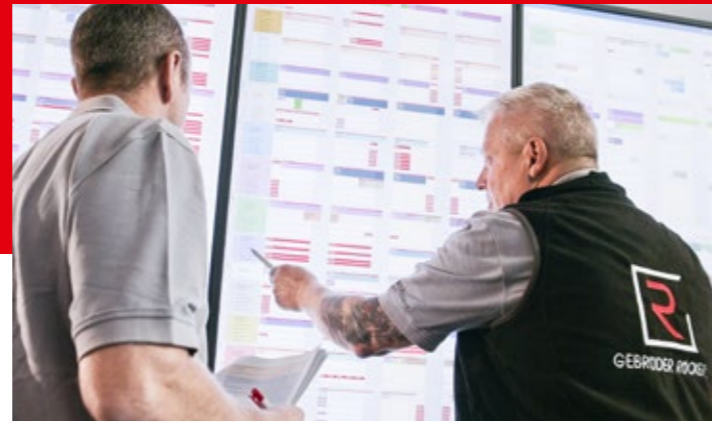

With our unique expertise, we at the Rückert Group ensure that flat roofs and PV systems are perfectly matched in every situation. To achieve this, we use state-of-the-art tools and technologies, which we tailor precisely to your needs.

SUPERHEROES FOR ROOFS AND WALLS

The impressive success story of the Rückert Group has been and continues to be written by our employees. Because only a dedicated team can develop the ability to make the extraordinary a reality for our customers.

WE ARE TEAM RÜCKERT

“Guten Dach” from Team Rückert at its headquarters in Gosheim in the Swabian Alb.

One group – three companies – 450 superheroes

Every good company is only as strong as its employees: at the Rückert Group, these are not just empty words. Appreciation, joint leisure activities, team spirit, joint training and further education, company teams in soccer or darts tournaments... Our superheroes work hard and celebrate successes as a real team. You can count on it!

Our "Haifischbar" is much more than just an ordinary lounge. It is a feel-good stage where you can exchange ideas and celebrate successes together after a hard day's work. This is how team building works at Rückert: high performance. Together. Anytime.

SUPERPOWERS WANTED

REFERENCE EXAMPLES

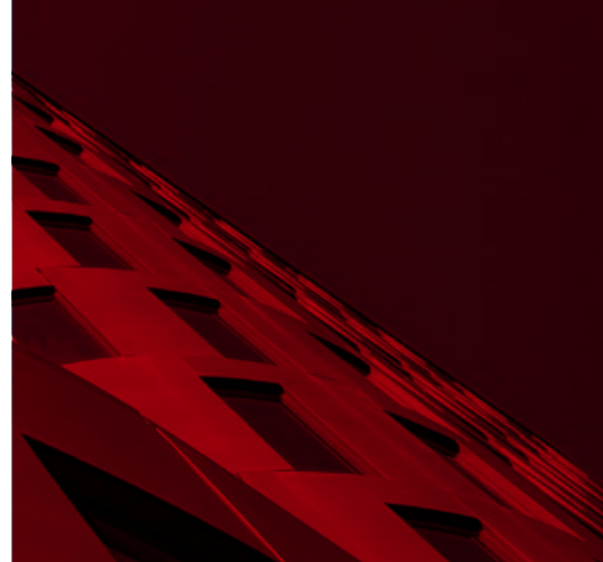

On the following double page, you will find five typical examples from over 10,000 completed projects, as well as a selection of well-known customers.

Tesla Neu-Ulm

Trapezoidal sheet metal & wall cladding New construction

- 3,476 m² roof shell and trapezoidal sheet metal
- 2,090 m² wall cladding

Schwaketenbad Konstanz

Roof waterproofing work on new building

- 7,000 m² 3-layer bitumen waterproofing work
- 7,000 m² roof graveling

ALWA, Deißlingen

- 560 m² mineral wool
- 560 m² sandwich elements including curves
- 465 m² vapor barrier
- 465 m² polystyrene insulation
- 465 m² glass fleece
- 465 m² plastic fleece
- 580 m² FPO waterproofing

Autohaus Hahn, Pforzheim

- 1,600 m² dismantling of existing ISO panel facade
- 3,005 m² exterior facade ISO wall including curves
- 440 running meters base angle brackets
- 600 running meters cross joints for horizontal installation (pilaster strips)
- 200 running meters of reveal formation on doors, gates, and windows
- 210 m² cladding of the interior parapet with ISO wall
- 340 running meters of aluminum parapet covering

All of the information provided so far has come exclusively from us. Even though we are known for the fact that our word still counts at the Rückert Group, some people may think: "They can tell us a lot." That is why we would like to conclude our brochure by giving the floor to our customers.

WHAT OUR CUSTOMERS SAY

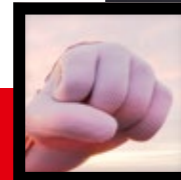

To be successful, Trigema also needs good suppliers—and those who prove themselves over the long term become our partners. Gebrüder Rückert has earned its status as a partner through many years of cooperation—thanks to its professionalism, reliability, and absolute adherence to deadlines. I look forward to continuing our collaboration.

Wolfgang Grupp, Trigema e.K.

**Wilhelm Layher Verwaltungs GmbH,
Eibensbach-Güglingen**

Renovating industrial roofs while production is ongoing is a challenge that requires not only excellent planning but also flexibility. In Gebrüder Rückert, we have found a reliable partner with whom we have successfully completed many projects. Mr. Rückert personally stands behind his company's quality promise and, together with his team, quickly finds the right solutions. Even in difficult situations (in the truest sense of the word), Gebrüder Rückert did not leave us out in the rain, but quickly and easily made more possible.

**Dr. Fritz Barth, Head of Technical
Service and Investments**

**WHAT OUR
CUSTOMERS SAY**

LOGA Präzisionsteile GmbH & Co. KG, Aldingen

We have been working with Gebrüder Rückert since 2011 – and with good reason. Marc Rückert's team stands out for its expertise, flexibility, and customer focus. Our collaboration is always personal and based on partnership. What we particularly appreciate is that the Rückert team thinks outside the box..

Peter Loga, Managing Director

Peter Gross Hochbau GmbH & Co. KG, Karlsruhe

With Gebrüder Rückert, Peter Gross Bau has a powerful partner at its side when it comes to facades and roofs. This valuable partner not only contributes to our business success in our joint projects, but also thinks and acts in line with our values of "goal-oriented – transformative – human," which makes the collaboration particularly valuable.

Michael Ebner, Project Manager

Depenbrock Gebäudemanagement GmbH & Co. KG, Bielefeld

To maintain the operability of commercial properties and ensure operator responsibility, we as facility managers need professional partners who can reliably master even unusual challenges in extreme weather conditions caused by snow. We have found such a partner in Gebrüder Rückert and look forward to continuing our trusting cooperation in the years to come.
